

Elementary/Middle School Rankings Based on Index Scores from May 2008 NH-Alt and May 2008 NECAP Science Statewide Assessments

Content: Science

Sorted by: Name

Science rankings were produced for the first time in 2008. The data provided in these rankings are based on performance index scores defined for AYP reporting in mathematics and reading. A ranking based on improvement will be available for the first time in 2009. Schools that have the same index score earn the same ranking.

† Number of students who contributed to the index score.

‡ There is some variation associated with all measurement, including test scores. For example, the results of public opinion polls are reported with a margin of error, such as 54 percent plus or minus (+/-) five percent. On these ranking lists the reported variation is the standard error of the mean (SE). Please note that as the number of students increases, the SE decreases.

* The SE is less than 0.1.

“A” A ranking is not assigned when fewer than eleven (11) student scores are included in the index score for a school or district.

“B” A ranking is not assigned for index score improvement if fewer than eleven (11) student scores were included in either the current or prior year index score.

“NA” Data is not available.

Science rankings were produced for the first time in 2008. The data provided in these rankings are based on performance index scores defined for AYP reporting in mathematics and reading. A ranking based on improvement will be available for the first time in 2009. Schools that have the same index score earn the same ranking.

‡ There is some variation associated with all measurement, including test scores. For example, the results of public opinion polls are reported with a margin of error, such as 54 percent plus or minus (+/-) five percent. On these ranking lists the reported variation is the standard error of the mean (SE). Please note that as the number of students increases, the SE decreases.

* The SE is less than 0.1.

“A” A ranking is not assigned when fewer than eleven (11) student scores are included in the index score for a school or district.

“B” A ranking is not assigned for index score improvement if fewer than eleven (11) student scores were included in either the current or prior year index score.

“NA” Data is not available.

Elementary/Middle School Rankings Based on Index Scores from May 2008 NH-Alt and May 2008 NECAP Science Statewide Assessments

Content: Science
Sorted by: Name

Science rankings were produced for the first time in 2008. The data provided in these rankings are based on performance index scores defined for AYP reporting in mathematics and reading. A ranking based on improvement will be available for the first time in 2009. Schools that have the same index score earn the same ranking.

‡ There is some variation associated with all measurement, including test scores. For example, the results of public opinion polls are reported with a margin of error, such as 54 percent plus or minus (+/-) five percent. On these ranking lists the reported variation is the standard error of the mean (SE). Please note that as the number of students increases, the SE decreases.

* The SE is less than 0.1.

“A” A ranking is not assigned when fewer than eleven (11) student scores are included in the index score for a school or district.

“B” A ranking is not assigned for index score improvement if fewer than eleven (11) student scores were included in either the current or prior year index score.

“NA” Data is not available.

Sorted by: Index Score Ranking

Science rankings were produced for the first time in 2008. The data provided in these rankings are based on performance index scores defined for AYP reporting in mathematics and reading. A ranking based on improvement will be available for the first time in 2009. Schools that have the same index score earn the same ranking.

† Number of students who contributed to the index score.

‡ There is some variation associated with all measurement, including test scores. For example, the results of public opinion polls are reported with a margin of error, such as 54 percent plus or minus (+/-) five percent. On these ranking lists the reported variation is the standard error of the mean (SE). Please note that as the number of students increases, the SE decreases.

* The SE is less than 0.1.

“A” A ranking is not assigned when fewer than eleven (11) student scores are included in the index score for a school or district.

“B” A ranking is not assigned for index score improvement if fewer than eleven (11) student scores were included in either the current or prior year index score.

“NA” Data is not available.

Elementary/Middle School Rankings Based on Index Scores from May 2008 NH-Alt and May 2008 NECAP Science Statewide Assessments Content: Science

Sorted by: Index Score Ranking

Science rankings were produced for the first time in 2008. The data provided in these rankings are based on performance index scores defined for AYP reporting in mathematics and reading. A ranking based on improvement will be available for the first time in 2009. Schools that have the same index score earn the same ranking.

[†] Number of students who contributed to the index score.

[‡] There is some variation associated with all measurement, including test scores. For example, the results of public opinion polls are reported with a margin of error, such as 54 percent plus or minus (+/-) five percent. On these ranking lists the reported variation is the standard error of the mean (SE). Please note that as the number of students increases, the SE decreases.

* The SE is less than 0.1.

“A” A ranking is not assigned when fewer than eleven (11) student scores are included in the index score for a school or district.

“B” A ranking is not assigned for index score improvement if fewer than eleven (11) student scores were included in either the current or prior year index score.

“NA” Data is not available.
